Revolutionizing Student Mental Illness Risk Prevention

BrainDash is pioneering a new approach to student mental illness risk prevention in independent schools. Our technology platform transforms how schools identify, support, and nurture student mental health through:

- Clinical-grade biomarker monitoring
- Evidence-based early warning detection
- Personalized prevention pathways
- Seamless communication between counselors, teachers, and families
- Wellness program optimization

braindash

The Challenge We're Solving

- 1 in 5 students struggle with mental health challenges
- Traditional support systems are overwhelmed
- Schools lack early warning systems
- Limited resources for personalized intervention
- Growing need for preventive mental health risk prevention

Our Innovation

BrainDash combines cutting-edge technology with known mental illness risk practices to:

- Identify early warning signs through clinical biomarkers
- Provide actionable insights to school counselors
- Enable data-driven intervention strategies
- Support whole-student well-being
- Strengthen school-family communication

Product Advisory Board

Who we are seeking:

School Leaders

- Heads of School
- Counseling Directors
- Student Life Leaders
- Wellness Program Directors

Mental Health Experts

- School Psychologists
- Child Development Specialists
- Mental Health Innovators
- Wellness Program Leaders
